RE: DEC ID# 2-6101-00071/00024
GREENPOINT ENERGY CTR

The Brooklyn Union Gas Company
1 METROTECH CTR
BROOKLYN, NY 11201-3831

Dear Applicant:

On 11/2/2020 your application was determined to be complete. However, subsequent technical review of your application shows the following information is required to make findings and determinations required by the Environmental Conservation Law:

1. Revised Application Package to Reflect Reduced Project Scope:

Based on our recent discussion, it has come to the Department's attention that National Grid seeks to reduce the proposed project scope and no longer proposes to install two (2) new Compressed Natural Gas (CNG) injection heaters that were proposed in order to supplement natural gas supply by injecting CNG delivered by trucks as needed during periods of peak demand.

To eliminate this project component, amend all applicable aspects of your original application package, including the attached Air Application Form and supporting documentation (including the Short Environmental Assessment Form (SEAF)), and submit to the Department. To clearly show the proposed changes and assist review, strike-through all details and references to the CNG project component that no longer apply, red-line any proposed changes (*i.e.* updated formulas, calculations, emissions information) and submit to the Department with the supporting documentation, including a new SEAF.

Pursuant to 6NYCRR621.14(b) this information must be provided by 2/23/2021. Failure to provide this information by the date specified in this request may be grounds for denial of your application.

If you have questions or need more time to provide this information, please contact me at the address above.

Sincerely,

Caitlyn Nichols

Caitlyn P Nichols
